Professional summary

I am Bara Sameeh Barakat, a web developer (front-end developer - junior), but I strive to develop and transform new ideas into wonderful, responsive design interfaces.

Working under pressure proves that I am capable of providing innovative solutions by building designs that serve you for a long time and are adjustable.

experience

freelance developer, [mostaql], I have been working as a freelancer for a year (1-12-2023)

Projects

Weather App

- This program aims to provide accurate and up-to-date information about the weather in selected cities. The program uses JavaScript programming language to interact with websites and retrieve weather data through an Application Programming Interface (API).
